IBM	IBM TIVOLI SOFTWARE	4%	

By combining Texas-based service and support with the advantageous pricing structure established by the DIR, we can offer outstanding value to Texas government and education. Placing your order through MARK III Systems provides several benefits at no additional cost to your agency or the State of Texas. These benefits include:

- No requirement for costly and time-consuming competitive bids. DIR has established excellent pricing for all eligible government agencies and educational institutions in Texas.
- Working with a supplier experienced with providing IBM servers and storage products to Texas schools and government agencies means you receive expert assistance in selecting and specifying the ideal technology solution for your requirements.
- MARK III Systems has its own IBM-certified technical staff, so we can rapidly address customer requirements and complete the most challenging tasks on time and on budget.
- 100% HUB credit for ordering through MARK III Systems, a 100% Woman-Owned Business certified as a Historically-Underutilized Business by the Texas Building & Procurement Commission.
- You are working with a 100% Texas-owned company. Our income stays in Texas, providing jobs and opportunities and contributing to our state's financial growth.

If you are interested in purchasing other IBM products not on this list including IBM's pSeries, iSeries, and xSeries server lines, Mark III can help you obtain them through IBM's DIR Contract # DIR-SDD-190. You will receive partial HUB credit for these orders.
